

Denison Consulting Group Launches Industrial Internet of Things Training Program

NEW ORLEANS, April 10, 2017 -- [Denison Consulting Group](#), an engineering consulting firm and systems integrator specializing in the Industrial Internet of Things (IIoT), announces new training services to help organizations leverage the power of the IIoT. The training services span across operational technology (OT) and information technology (IT) and focus on the needs of manufacturing, industrial, large commercial, and government.

Denison Consulting Group's technical training services empower businesses to effectively glean insights from their organizations that lead to greater return on investments, improved efficiency, and reduced costs.

“Not only are we passing along our extensive knowledge of OT and IT, but we are sharing our lessons learned and the team structure required to deliver reliable network solutions in record time.” said [Dianne Denison](#), CEO of Denison Consulting Group.

Blanca Robinson, Business Development Director at Denison Consulting Group, will lead the technical training program. A veteran in the oil and gas industry, Robinson is a certified executive coach with experience developing and delivering large training programs that improve business outcomes.
