

Denison Consulting Group Delivers Connected Enterprise

[Denison Consulting Group](#), a woman-owned energy management, engineering and information technology consulting firm, announces its continued commitment to making the industrial internet of things (IIoT) a reality. The company is working closely with industry leaders such as The Reynolds Company, a premier Industrial and Commercial electrical supplier, to deliver the connected enterprise to world class organizations.

The collaboration with [The Reynolds Company](#) is one example of how best-in-class companies are trusting Denison Consulting Group to introduce real-time decision making solutions to improve efficiency, reduce costs, and increase profitability by leveraging the Industrial Internet of Things.

“We are able to harness the power of technology to help our customers save money on energy, improve performance, and avoid operational breakages before they occur,” says Dianne Denison Atkinson, CEO of Denison Consulting Group. “As a nimble, focused firm, with decades of experience, we are able to help companies realize the benefits of a connected enterprise with greater speed and flexibility.”

Denison Consulting Group offers an array of engineered solutions and IT Consulting services. The Reynolds Company is utilizing the firm’s ability to monitor and manage machines, equipment, and processes turning raw data into actionable, real-time information. Customers benefit from lower-cost entry points, greater return on investment and a platform capable of managing and monitoring a host of technology provider systems via "open architecture." This promotes greater flexibility, scalability, and the ability to add cost-saving features in the future to improve efficiencies.

“Denison’s solutions and market access make Denison Consulting Group a great partner for collaboration,” says Dean Bickerton of The Reynolds Company. “Our companies are aligned in our dedication to leveraging technology to improve productivity and efficiency while reducing costs for our customers.”

Together, Denison Consulting Group and The Reynolds Company are creating additional benefits to their industrial sector clients in manufacturing, oil and gas, chemical, agriculture, food and beverage and automotive.

The Reynolds Company and Denison Consulting Group will attend Rockwell Automation’s [Automation Fair](#) 2016 in Atlanta November 9-11 in Atlanta. Connect with Denison Consulting Group at the event, online at www.denisonconsultinggroup.com or (504) 919-4037.

ABOUT DENISON CONSULTING GROUP

Denison Consulting Group is an experienced team of engineering and business professionals that delivers turn-key engineering and consulting solutions for manufacturing, industrial and large commercial customers. The firm has decades of experience spanning across operational technology (OT) and information technology (IT) and a proven track record working with some of the world's largest technology companies. Denison Consulting Group is a member of several industry organizations including the National Association of Manufacturers, WE Connect International, and the Industrial Society of Automation.

ABOUT THE REYNOLDS COMPANY

The Reynolds Company is an independently owned and operated wholesale distributor headquartered in Fort Worth, TX, and is one of the largest distributors of Rockwell products. Over the last 30 years, The Reynolds Company remains privately owned and has grown to 18 U.S. locations across Texas and Louisiana, with multiple U.S. and international on-site facilities and export activity all over the world. Our ability to scale and manage large industrial and commercial projects anywhere in the world has been a major contributor to our growth and is our trademark in the industry. Hiring resident experts in the field, we are committed to bringing our customers together with representatives you have grown to trust, supported by a customer-focused company.
